

Board Consultant Letter Reports on Seismic Issues

On February 24, 2003, the Nuclear Waste Technical Review Board (Board) held a joint meeting of its Panel on the Natural System and its Panel on the Engineered System that was devoted to seismic issues. Attached are letter reports on that meeting from Board consultants Dr. Alfred Hendron (Professor Emeritus at the University of Illinois), Dr. Peter Kaiser (Laurentian University), Dr. Arthur McGarr (U.S. Geological Survey), and Dr. Anestis Veletsos (Rice University). Consultant reports do not necessarily represent the views of the Nuclear Waste Technical Review Board.
