MEMORANDUM TO: Nuclear Waste Technical Review Board

FROM: Neysa Slater-Chandler  
Director of Administration  
Nuclear Waste Technical Review Board

SUBJECT: Completing the Transition to  
Internet Protocol Version 6 (IPv6)

In accordance with Office of Management and Budget (OMB) Memorandum 21-07 (M-21-07), dated November 19, 2020, by Fiscal Year (FY) 2023, all new NWTRB information systems must be IPv6-enabled at the time of deployment. It is also the strategic intent of NWTRB to phase out the use of IPv4 for all current NWTRB systems as soon as practical by meeting the milestones laid out by M-21-07, to include at least 80% of IP-enabled assets on NWTRB networks operating in IPv6-only environments by the end of FY 2025.

This memorandum designates Mr. Jayson Bright as the lead of NWTRB's IPv6 Integrated Project Team (IPT) to coordinate these actions. The IPT is responsible for developing and overseeing the overall IPv6 transition and implementation plan which shall be inclusive of strategies, acquisitions, processes, status, and milestones. For questions regarding this memorandum, please contact Mr. Bright at [bright@nwtrb.gov](mailto:bright@nwtrb.gov).
